TABLE 1

SUMMARY OF INTERPRETATIVE PALYNOLOGICAL DATA

SAMPLE	DEPTH (m)	SPORE-POLLEN ZONE	AGE	CONF. RTG.	COMMENTS
Core	10 a	Indeterminate	Indeterminate	-	M. ornamentalis
Core	10 b	L. balmei	Palaeocene	1	N. kaitangata, H. harrisii
a = larger of two core chips					
b = smaller of two core chips					

Please note that each age-determination is based on the internal evidence of that sample

0 SWC or Core High Confidence. Assemblage contains index fossil(s)

1 SWC or Core Medium Confidence. Diverse, well-preserved assemblage, lacking index species but otherwise characteristic of zonule

2 SWC or Core Low Confidence. Low diversity/poorly preserved assemblage of long-ranging species

3 Cuttings or badly contaminated SWC Low to Very Low Confidence

4 Barren Samples
