GEOLOGY

Recent - sluiced alluvial workings
River alluvium.

Basalt scree

Dolerite intrusive

Mathinna Beds sediments (minor)

BLUE TIER COMPOSITE BATHOLITH
- Older intrusions
Mesocratic porphyritic biotite granite

Generally coarse grained (C.B.G.)

Generally medium grained (C.B.G.)

LOTTAH GRANITE - younger intrusions
Leucocratic isolamogular granites

Anchor Granite Similar to lower granite in Anchor Mine; medium grained (A.G.)

Fine to medium grained, reticulate or other leucocratic types. (F.G.G.)
e.g. quartz - tourmaline porphyry (Q.P.)
aplite, pegmatite granite segregations

Greisenized rock

5 cm
