Dear Sir,

Re: Subdivision of Nine Lots, Grassy Township

We refer to your letter dated 3rd April, 1973 regarding the measurement of the Eastern side of lot 9.

Our proposal plan showed 60'9". This measurement should have in fact been 90'9" to agree with the distance by scale and your plan. In the actual survey when we pegged the boundaries of the lot, the Eastern boundary was made 90'9<sup>3</sup>/<sub>4</sub> as required. This measurement is shown on the final subdivision plan, a copy of which is enclosed together with other copies for your information.

As your solicitors now have two of the three final survey plans, we expect that they will shortly ask you to complete the necessary transfer documents for the lots.

Yours faithfully,  
PEACOCK, DARCEY & ANDERSON.
