TO GENERAL MINING SUPERINTENDENT
c.c SENIOR SURVEYOR

Date.....17th August, 1971.....

FROM SENIOR GEOLOGIST.

MINING LEASE APPLICATIONS

We now appear to be in a position to proceed with the consolidation of the Bold Head Leases and the present Mine Consolidated Lease. To do this we have to firstly block out the area between Bold Head and the mine lease with ordinary 80 acre Mineral Leases. At this stage it is requested that the Survey Department;

- (i) Using the south-east corner of Lease 732P/M as a datum locate on the ground the datums for all leases required to be pegged. The datums are represented by "P.N." on the accompanying plan.
- (ii) Accurately compute the areas of the leases that are not full 80 acre Mineral Leases.

As soon as this work is completed we can proceed with the pegging of these leases. These new leases will cover the No. 1 Tails Dam, Mill Site Area and the No. 2 Dam on the Grassy River.
