

LEGEND

Refer to
Dwg. No. M1225/1-11
for details.

NOTES

- The pre-construction natural surface profile is based on Dwg. No. M1147/1/6, 15-7-75.
 - The shear zones shown on the lower abutments were encountered during grouting operations. They were not observed during surface mapping in this or previous investigations and are therefore not shown on the site plan. Shear zones on the upper right abutment are discussed in construction reports and were observed in this investigation.
- * For general notes on foundation stripping, subgrade conditions and seepage control methods see Dwg. No. M1225/1-12.
