

1. The location of previously drilled holes Nos 1-18 (indicated by small circles) were derived from a copy of a plan 'Pioneer Boring'. These were scaled and transposed onto the ground in relation to existing lease corners, as shown at hole 9. Topographic details shown have been plotted from Consolidated Lease Plan No. 241
2. Positions 19-28, indicated by crosses, were marked as requested.
3. All hole positions are marked by dumpy peg, numbered slab and bush stake with ribbon
4. The extension of lines 1-3 and 15-18 were cleared and bush stakes placed at the junction of these grid lines and 4-25 & 5-27 extended. Ground levels are shown at these points.
5. Level datum is arbitrary and the reduced level values shown are in metres.
6. The pegs placed at locations 5 and 25 are not in the true grid position. Dumpy at 5 is 2.68 North of grid position. Dumpy at 25 is 2.14 North of grid position.
