

TR16-21-21

5. G.F. Cotton's mining lease 121M/69, Mathinna Plains.

V.M. Threader

The lease was visited on 1 April 1971. A previous visit was made on 8 August 1970 (Threader, 1973).

The lease holder, G.F. Cotton states that a gold reef lies in the area covered by his lease as he remembers it from previous experience in the district 60 years ago. He has made very little progress in the intervening 10 months between the two visits. This lease area lies about 5 km south-west of the Alberton goldfield in, so far as is known, unmineralised Mathinna Beds. There is little hope of finding payable quantities of gold.
