MEMORANDUMUNDERGROUND WATER ON PROPERTY OF
N.M. BURBURY, JERICHO.

I have visited Jericho and conferred with Mr. Burbury on the selection of sites for the bore.

No. 1 Site is already down to water.

No. 2 Site is rather doubtful as it is too close to the dolerite boundary. I advised boring further down the hill where there is a better chance of striking water. This is by no means definite but worth the risk of boring which should be stopped if dolerite is encountered.

No. 3 Site is favourable.

No. 4 Site is impracticable and Mr. Burbury will not put this bore down.
