MEMORANDUM:BORING FOR WATER AT CAMERON'S
PROPERTY, CHUDLEIGH.

On 20th March I visited Mr. Cameron's property and talked with his son and Harrison, the Driller. The hole was then down 58 feet. From the cuttings shown me the rock being drilled was a normal blue limestone. As the drill (or the driller) seemed incapable of boring this material and the likelihood of obtaining water was not certain it was decided to abandon this hole, and a site for another on the flat was discussed with Mr. Cameron Junior.
