MEMORANDUMLIMESTONE ON AREA APPLIED FOR PURCHASE
BY L.D. McRAE, SALT WATER LAGOON.

An examination of this land shows that the greater portion of the eastern part of the area applied for, to the north of Salt Water Lagoon, is covered by limestone, and that west of this belt limestones are absent.

The attached plan indicates the limestone outcrop in relation to the Crown land applied for and the adjoining purchased land.

It would appear that, in the event of an amended application, no objection could be raised by this Department to the purchase of that part of the original application west of the green line on the plan.
