

UNPUBLISHED REPORT 1969/18

Mineralogy of a sand sample from Louisa Bay

by G. B. Everard

A black sand sample from Louisa Bay, received from Mr Forster, was panned off and found to contain the following heavy minerals:

Garnet 50%
Ilmenite 40%
Zircon 5%
Rutile 3%
Tourmaline 1%

The heavy fraction was roughly estimated to be 50% of the whole sample.
