

**UNPUBLISHED REPORT 1969/23**

## **Examination of samples from the Nudec oil rig**

*by G. B. Everard*

Two samples of cuttings taken at the site of the Nudec oil rig (J. Sulzberger) were received from Inspector L. Egan and examined and identified. The drill was located 300–400 yards south of the Bass Highway at 'Fair View', Hagley.

90 to 120' — dolerite

about 400' — fossil carbonised wood apparently of Recent age, or possibly Tertiary.
