

data. Analog to digital transcription of data from earlier single-fold and three-fold CDP survey is an improvement for shallow reflections only. It is recommended that digital processing of digitally recorded data be completed in areas where Basement is not shallow.

Pre-Tertiary structural attitudes have been outlined in South Australia, but not in Victoria and Tasmania.

Data quality in the Pre-Tertiary from Geltwood Beach-1 to east of Esso Prawn A-1 is fair to poor. More high effort shooting and possibly more well control will be necessary in the centre of the Otway Basin to delineate Cretaceous hydrocarbon traps.
