

SECTION II

DIGITAL PROCESSING

The following processing sequence was applied to the data. All data were processed to a record time of 4.0 seconds at a sample period of 4 milliseconds.

A. SEQUENCE

1. Vertical Stack :
  - a. True Amplitude Recovery.
  - b. Trace Edit.
  - c. Vertical Stack (as required).
  
2. Pre-Processing :
  - a. Trace Edit.
  - b. Pre-deconvolution Ramp Scaling.
  - c. Static Corrections.
  - d. Deconvolution.
  - e. Time Variant Scaling.
  - f. Common Depth Point Gather.
  - g. Near Trace Gather.
  - h. Annotation of Water Depth and Offset Information.
