

1. GENERAL DATA

The Cape Nelson to Cape Otway Seismic Survey was carried out for the operator, Hematite Petroleum Pty. Ltd., by Geophysical Service International, in an area extending from the South Australia, Victoria border to near King Island, in permits Vic/P6, Vic/P7 and T/3P.

The seismic interpretation was undertaken by J.I. Denham, Senior Geophysicist, E. G. Urschel, Geophysicist, M. McNicol, Geophysicist, and N. O'Halloran, Consultant, and the section on regional geology was written by I. Mellins, Geologist, and B.R. Brown, Senior Geologist.

Shooting commenced on 15th September 1973, and was completed on 22nd October 1973. Further details are given in the contractor's reports which appear as Appendices 1, 2 and 3 to this report.
