

final location maps at scales of 1:100,000 and 1:250,000 utilising the Australian National Spheroid, Universal Transverse Mercator Projection and Mapping Zone 54.

Station pairs were selected so that all shotpoint fixes were made from range position line intersecting angles falling between 30 and 150 degrees.

H. PERMITTING :

Shore station site information was supplied by G.S.I. and permits obtained by Hematite Petroleum Proprietary Limited. The Marine Operations Centre, Canberra, was advised as to the ship's location throughout the survey to enable the necessary navigation warning to mariners to be issued.
