

V. FIELD OPERATIONS RECAP (continued)

12 September 1973 -

The M/V EUGENE MCDERMOTT II arrived at Portland. The Shoran mobile indicating equipment was placed on board the vessel and installed. Shoran Three-Way Fixes were observed at the wharf.

13 September 1973 -

The M/V EUGENE MCDERMOTT II departed Portland this date to observe Shoran baseline measurements.

Geophysical operations began at 0836 hours 15 September 1973 and were completed 22 October 1973. A final Shoran Three-Way Fix was observed on completion of the survey. The M/V EUGENE MCDERMOTT II returned to Portland on completion of the survey.

The Shoran mobile indicating equipment was removed from the M/V EUGENE MCDERMOTT II 23 October 1973 for the next operation.
