

VII. MAPPING

Prior to the commencement of this survey, machine computed preplots and track plot sheets, indicating the Shoran and grid coordinates of each shotpoint location to be occupied during this survey period, were provided to the field by GSI and ONI. The preplots were processed by Engineering Computer Services of Sydney, N.S.W., Australia, and the trackplots were processed by Offshore Navigation, Inc. of New Orleans, Louisiana, U.S.A.

No final mapping of this survey was accomplished by ONI.

All Shoran field data was turned over to the GSI representative at the conclusion of the survey.

For the purpose of preplotting of the survey program, the Universal Transverse Mercator Projection, Australian National Spheroid of Reference, Zone 54, Central Meridian 141° East, AUSTRALIAN GEODETIC DATUM was used.
