

IV PROCESSING AND REPROCESSING OF SEISMIC DATA**IV.1 INTRODUCTION**

Western Geophysical in Singapore was awarded a contract on processing of the Bass Bridge 85 data.

It was decided to re-process some old data after a successful reprocessing of several lines had been carried by BMR.

Reprocessing contract was awarded to Digicon in Brisbane.

Several lines were chosen as test lines, on which comprehensive sets of tests were run to establish parameters for production processing. Necessary adjustments were made during processing, when it was necessary according to the data.

Processing and reprocessing were carried out in the months of May to July 1985.
