

	PAGE
5.4.4 Discussion of Results	34
5.4.5 Requirements of Basin Wide Maturation Study	35
5.5 Conclusions	37
6.0 GENERATION AND MIGRATION	39
6.1 Introduction	39
6.2 Interpretation of Generative History and Migration	39
6.2.1 EVCM Below the Upper <u>L. balmei</u> zone	39
6.2.2. <u>M. diversus</u> Unconformity to Top of <u>L. balmei</u> zone	42
6.2.3 Upper EVCM (post <u>M. diversus</u> Unconformity)	43
7.0 SEALS AND TRAPS	43
7.1 Introduction	43
7.2 Important Factors To Consider	44
7.3 Overpressure: Implications for Sealing	44
7.4 Results	45
8.0 HYDROCARBON POTENTIAL	48
8.1 The Pelican-Type Play	48
8.1.1 Reserves	50
8.2 Trend of the Pelican-Type Play	50
8.2.1 Potential Reserves	52
8.3 The Pipipa-Type Play	52
8.4 Trend of the Pipipa-Type Play	54
8.5 Pipipa-Type Play with Facies Controlled Seal to Northwest	55
8.6 Pelican-Type with Large Recurrent Faults	55
