

- : 1 unit GEOSPACE FILM
PLOTTER (Resolution : 508
dots/inch)
- 7) Digitiser : 2 units summagraphic
digitising tables
- 1 unit TEKTRONIX graphics terminal and one hard copy unit
- 1 unit off-line ammonia printer

The DISCO system (Digicon's interactive seismic computer) is an extension of the Digicon's modular seismic data processing developed over many years. Being modular, the system is completely flexible allowing complete user control of the number and sequence of operations performed in any job. The DISCO seismic monitor assembles the selected modules in the specified order and controls the processing run.
