

III. GENERAL INFORMATION (continued)

- E. The Maxiran field data accumulated during this survey was turned over to Mr. Dave Scott, the TRITON representative, on 12 February 1986. The final Maxiran ranges recorded were transmitted to the ONA office in Perth, W.A. for final computation.
- F. The maximum usable range observed during this survey was 120 kilometers. Signal quality was reported as best between 0800 and 1900 hours.
