

B1.7 Final Well Location

The pre-spud well location was determined by Offshore Navigation (Australia) P/L (ONA) using the Maxiran radio-positioning system. Its final location, post-spud, was determined using both the Maxiran and the Navstar Global Positioning System (GPS). The final coordinates used in this report are those obtained from the GPS measurements, i.e.:

Latitude: 40° 10' 53.430" S
Longitude: 146° 41' 54.955" E

The final report from ONA is included with this Well Completion Report as Appendix 1.
