

III. GENERAL INFORMATION (continued)

- E. The Maxiran field data accumulated during this survey was turned over to Mr. Dave Scott, the TRITON representative, on 19 January 1986. The final Maxiran ranges recorded were transmitted to the ONA office in Perth, W.A. for final computation.
- F. The maximum usable range observed during this survey was 150 miles. Signal quality was reported as best between 0500 and 2100 hours.
