

**STATION:** HARDWICKES HILL

**LOCATED:** The station is located on Hardwickes Hill, which is on the north coast of Tasmania, Australia, approximately 90 kilometers northeast of Launceston.

**ACCESS:** Access to this station is by two-wheel drive vehicle. Equipment can be unloaded directly on the site.

From Bridport, drive east for approximately 24 kilometers to a road which turns to the right and is signposted "Scottdale 33". From this point, travel a further 3 kilometers and cross a bridge. A track will be found on the left side of the road, 100 meters after crossing the bridge. Turn onto this track and drive 8 kilometers to a "Y" junction. Veer left at this junction. This track will bring you to the telecom station where the station marker is located, approximately one kilometer from the "Y" junction.

**MARKER:** The station marker is located on the outside of the fenced in telecom compound. The marker consists of a 30 cm concrete disc with a star picket protruding 5 cm in the center. The marker is 7.5 meters, at a bearing of 00° Magnetic, from the second fence post to the right of the compound gate, and 10.5 meters from the edge of the road. This marker is referred to as "Maxiran Marker WG 85". The Maxiran tower was erected adjacent to this marker.

A second marker, referred to as "S.T. 357", is located 49.107 meters, at a bearing of 11°06'40", from the Maxiran marker. No further description on this marker was made available.
