

CONTENTS

Summary

Introduction

 Analytical

 General Information

Discussion of the Results

 A. Thermal Maturity of Sediments

 B. Hydrocarbon Source Character

Theory & Methods

1. Sedimentary Gas Analysis
 - a) Headspace Analysis
 - b) Cuttings Gas Analysis
2. Sample Preparation
 - a) Cuttings
 - b) Sidewall Cores
 - c) Conventional Core & Outcrop Samples
 - d) Petroleum/Aqueous Mixtures
3. Total Organic Carbon Determination
4. Rock-Eval Pyrolysis
5. Extraction of Sediment Samples
6. Separation of Petroleum into Constituent Fractions
7. Extractable/Total Organic Carbon Ratios
8. Pyrolysis Gas Chromatography
9. C12+ Gas Chromatography
10. API/Specific Gravity
11. Sulphur Determination
12. C1 – C31 Whole Sample Gas Chromatography
13. Molecular Sieve Extraction
14. Computerised Gas Chromatography/Mass Spectrometry (GC/MS)
15. Carbon Isotope Analysis
16. Vitrinite Reflectance Measurement
17. Visual Kerogen
