

1130 - 1140	80	Claystone: As above.
	20	Sandstone: As above, trace pyrite cement.
1140 - 1150	90	Claystone: As above.
	10	Sandstone: As above, becoming medium to coarse grained and subround to round in part, occasionally very coarse.
1150 - 1160	100	Claystone: Light to medium grey, light grey green, light grey brown, common calcareous grains and shell fragments, trace disseminated and nodular pyrite, glauconite in part, locally silty with carbonaceous specks, soft to firm.
1160 - 1170	100	Claystone: As above.
1170 - 1180	100	Claystone: As above.
1190 - 1200	100	Claystone: As above, becoming common grey brown and slightly to moderately calcareous.
1200 - 1210	100	Claystone: As above, generally medium grey to grey brown, grey green, slightly to moderately calcareous.
1210 - 1220	100	Claystone: As above, at 1210m
1220 - 1230	100	Claystone: As above, grey, grey green, rarely grey green, slightly to moderately calcareous, common shell fragments and Foraminifera, trace disseminated pyrite, trace glauconite in part, trace carbonaceous specks, soft to firm, blocky to subfissile, locally common silt sized calcite, locally grades to argillaceous calcilutite.
1230 - 1240	100	Claystone: As above.
1240 - 1250	100	Claystone: As above.
	Tr	Dolomite: Orangy tan, cryptocrystalline, very hard, brittle.
	Tr	Limestone: White, microcrystalline, glauconite, hard, blocky, no porosity, no show, grades to calcilutite.
1250 - 1260	100	Claystone: As above.
	Tr	Limestone: As above, and light grey.
1260 - 1270	90	Claystone: As above.
	10	Limestone: Grey to grey brown, microcrystalline, very argillaceous, trace glauconite and carbonaceous specks, calcisiltite, soft and friable, trace intergranular porosity, grades to Marl.
1270 - 1280	90	Claystone: As above.
	10	Limestone: As above.
1280 - 1290	90	Claystone: As above.
	10	Limestone: As above.
