

- grained, locally very well cemented with strong calcareous cement, friable to loose, fair visual porosity, no show, no cut.
- 1668 - 1671 100 Sandstone: As above, fine to medium, well sorted, weak calcareous cement, trace mica, friable, fair porosity, no show, no cut.
- 1671 - 1674 100 Sandstone: As above, fine to medium, well sorted, trace pink and orange quartz and chert, trace mica, trace pyrite, weak calcareous cement, friable, fair porosity, no show, no cut, becoming cleaner.
- 1674 - 1677 90 Sandstone: As above, fine to medium, well sorted, subangular, weak calcareous cement, fair porosity, no show, no cut.
10 Claystone: Dark grey brown, carbonaceous, firm, subfissile.
- 1677 - 1680 100 Sandstone: As above, fine to medium grained, subangular, weak calcareous cement, clean, trace mica, trace pyrite, fair porosity, no show, no cut.
- 1680 - 1683 80 Sandstone: As above, fine to medium, subangular, weak calcareous cement, fair porosity, no show, no cut.
10 Claystone: As above, soft and dispersive.
10 Siltstone: greenish white, dolomitic, glauconite, very hard to hard, no porosity, no show.
Tr Dolomite: Brown, cryptocrystalline, very hard, brittle.
- 1683 - 1686 70 Sandstone: As above, fine to medium grained, subangular, well sorted, weak calcareous cement, common pyrite, trace mica, fair porosity, no show, no cut.
10 Claystone: As above.
10 Siltstone: As above.
10 Coal: Black, subvitreous to dull, firm to hard, platy, sub-bituminous.
- 1686 - 1689 100 Sandstone: As above, fine to medium grained, subangular, well sorted, weak calcareous cement, trace pyrite, trace mica, fair porosity, no show, no cut.
- 1689 - 1692 100 Sandstone: White, translucent, clean, as above, fine to medium, subangular, weak calcareous cement, trace pyrite, trace mica, good porosity, no show, no cut.
- 1692 - 1695 90 Sandstone: As above, fine to coarse grained, moderately sorted, subangular to subround, weak calcareous cement, trace pyrite, trace interstitial clay, trace mica, friable, fair porosity, no show, no cut.
10 Claystone: Dark grey brown, micromicaceous, non calcareous, firm to hard, subfissile to fissile.
- 1695 - 1698 50 Sandstone: As above, fine, locally very well cemented and very hard.
50 Claystone: As above, becoming soft and dispersive.
- 1698 - 1701 70 Sandstone: As above, colourless, translucent to opaque, fine,
