

740 - 750	80	Limestone: As above.
	20	Claystone: As above.
750 - 760	80	Limestone: As above, medium to very coarse bioclastic calcarenite, trace glauconite.
	20	Claystone: As above.
760 - 770	80	Limestone: As above, poor porosity, no show.
	20	Claystone: As above.
770 - 780	60	Limestone: As above.
	40	Claystone: Light grey, light greenish grey, slightly calcareous, common shell debris in part, trace glauconite, soluble, soft.
780 - 790	70	Limestone: As above, fine to medium calcarenite, bioclastic with abundant glauconite.
	30	Claystone: As above.
790 - 810	80	Limestone: Off white to cream, very coarse grained to microcrystalline, bioclastic calcarenite, abundant glauconite, slightly argillaceous, trace pyrite, friable to hard, poor intergranular porosity, no show.
	20	Claystone: As above, grading to a marl.
810 - 830	50	Limestone: As above, becoming more argillaceous.
	50	Claystone: Light grey, very calcareous, abundant shell fragments and Foraminifera, glauconitic, trace to common pyrite nodules, soft, soluble to dispersive.
830 - 840	60	Claystone: As above, very fossiliferous, grading in part to marl.
	40	Limestone: As above.
840 - 850	70	Claystone: As above.
	30	Limestone: As above.
850 - 860	70	Claystone: As above.
	30	Limestone: As above.
860 - 870	80	Claystone: As above, very fossiliferous, grading to argillaceous shelly Limestone.
	20	Limestone: As above, very argillaceous in part.
870 - 880	90	Claystone: As above.
	10	Limestone: As above, becoming predominantly light grey, bioclastic, very argillaceous, friable, nil porosity, no show.
880 - 890	100	Claystone: Light grey, slightly brownish to slightly greenish, glauconitic, abundant shell fragments and Foraminifera, rare pyrite nodules, soft to firm, soluble.
890 - 900	100	Claystone: As above.
900 - 910	100	Claystone: As above.
910 - 920	100	Claystone: As above becoming very calcareous, grading to marl.
