

MRC9304011-ACM

2193 - 2196	90	Claystone: As above.
	10	Sandstone: White to off white, very fine grained, well sorted, subrounded, spherical, moderate siliceous cement, common clay matrix, trace mica and altered feldspars, predominantly hard, no porosity, no show.
2196 - 2199	40	Coal: Black, subvitreous, hard, brittle, subconchoidal, angular.
	20	Sandstone: As above.
	40	Claystone: As above, dolomitic concretions, micaceous and carbonaceous.
2199 - 2202	30	Coal: As above.
	70	Claystone: As above.
2202 - 2205	20	Coal: As above.
	20	Sandstone: Colourless, translucent, fine grained, well sorted, subangular, weak siliceous cement, common clay matrix, trace mica, friable, fair porosity, no show.
	60	Claystone: As above.
2205 - 2208	100	Claystone: Dark grey to grey brown, firm, fissile, very carbonaceous and coaly, micaceous in part, locally silty, dolomitic concretions.
	Tr	Sandstone: As above.
2208 - 2211	100	Claystone: As above.
2211 - 2214	90	Claystone: As above.
	10	Coal: As above.
2214 - 2217	90	Claystone: As above.
	10	Sandstone: Light brown, off white, fine grained, subround, well sorted, weak to moderate siliceous cement, white clay matrix, friable to hard, trace porosity, no show.
2217 - 2220	90	Claystone: As above.
	10	Sandstone: As above.
	Tr	Coal.
2220 - 2223	90	Claystone: As above.
	10	Sandstone: As above.
