Mr. A. Phillips,
 ESSO Standard Australia Ltd.,
 G.P.O. Box 4249,
 SYDNEY, N.S.W.

Dear Sir,

We have cut a further three sections from Core 13 of Bass No. 3. These sections, when examined petrologically, consist of chert and disaggregated chert.

The spots on the slides you examined in Hobart have not been determined precisely but are considered to be possible cordierite. We could not detect any trace of volcanic material.

Yours faithfully,

(J.G. Symons)
 DIRECTOR OF MINES.
