

TABLE OF CONTENTS

I	Summary - (a) Drilling (b) Geological								
II	Introduction								
III	Well History								
	<table border="0"> <tr> <td>1. General Data</td> <td>4. Electrical & other logging surveys</td> </tr> <tr> <td>2. Drilling Data</td> <td>5. Testing</td> </tr> <tr> <td>3. Logging and Testing</td> <td>6. Potassium-Argon Age Determination</td> </tr> </table>	1. General Data	4. Electrical & other logging surveys	2. Drilling Data	5. Testing	3. Logging and Testing	6. Potassium-Argon Age Determination		
1. General Data	4. Electrical & other logging surveys								
2. Drilling Data	5. Testing								
3. Logging and Testing	6. Potassium-Argon Age Determination								
IV	Geology								
	<table border="0"> <tr> <td>1. Summary of previous geological and geophysical work</td> </tr> <tr> <td>2. Summary of regional geology</td> </tr> <tr> <td>3. Stratigraphic table</td> </tr> <tr> <td>4. Stratigraphy</td> </tr> <tr> <td>5. Structure</td> </tr> <tr> <td>6. Relevance to occurrence of <i>Hydrocarbons</i></td> </tr> <tr> <td>7. Porosity and permeability of <i>the section</i> penetrated</td> </tr> <tr> <td>8. Contribution to geologic concepts <i>resulting from drilling</i></td> </tr> </table>	1. Summary of previous geological and geophysical work	2. Summary of regional geology	3. Stratigraphic table	4. Stratigraphy	5. Structure	6. Relevance to occurrence of <i>Hydrocarbons</i>	7. Porosity and permeability of <i>the section</i> penetrated	8. Contribution to geologic concepts <i>resulting from drilling</i>
1. Summary of previous geological and geophysical work									
2. Summary of regional geology									
3. Stratigraphic table									
4. Stratigraphy									
5. Structure									
6. Relevance to occurrence of <i>Hydrocarbons</i>									
7. Porosity and permeability of <i>the section</i> penetrated									
8. Contribution to geologic concepts <i>resulting from drilling</i>									
V	References								
VI	<i>Figures</i>								
	<table border="0"> <tr> <td>1. Cross-Sections (Before and After Drilling) and Locality Map</td> </tr> <tr> <td>2. <i>Completion</i> Log</td> </tr> <tr> <td>3. Mud Log, Drilling Time, Drilling Data etc.</td> </tr> <tr> <td>4. Velocity Survey Time-Depth Relationship</td> </tr> <tr> <td>5. Well History Chart</td> </tr> <tr> <td>6. Log Analysis</td> </tr> </table>	1. Cross-Sections (Before and After Drilling) and Locality Map	2. <i>Completion</i> Log	3. Mud Log, Drilling Time, Drilling Data etc.	4. Velocity Survey Time-Depth Relationship	5. Well History Chart	6. Log Analysis		
1. Cross-Sections (Before and After Drilling) and Locality Map									
2. <i>Completion</i> Log									
3. Mud Log, Drilling Time, Drilling Data etc.									
4. Velocity Survey Time-Depth Relationship									
5. Well History Chart									
6. Log Analysis									

Appendices

1. Micropaleontological Reports
 - Palynology of Esso Clam - I by P.R. Evans & Robin D. Mulholland
 - Foraminiferal Sequence by D.J. Taylor
2. Petrographical Reports
 - Five Core Samples from an Oil Exploration Well (Clam - I) by The Australian Mineral Development Laboratories, South Australia
 - Report on Strata Cored in Clam - I off N.W. Tasmania by F.L. Sutherland
 - Petrographical Study of Cores by Dr. D. Spencer-Jones
 - Petrographical Study of Cores by D. Gee
3. Core Descriptions and Analysis
4. Potassium - Argon Age Determination
