

8300 - 9440

Interbedded SILTSTONE and SANDSTONE
with minor interbedded COAL and
SHALE/MUDSTONE.

SILTSTONE, light grey to dark brown,
firm, clayey, thinly laminated,
micaceous, carbonaceous.

SANDSTONE, white to light grey and
brown, firm to unconsolidated, fine
to very coarse, bimodal in part,
mostly clay choked, micaceous and
carbonaceous in part, in part
dolomitic. Rare sand size lithics
and reworked coal grains.
