

5960-6820 Interbedded sandstone, siltstone, shale and coal.

Sandstone, light grey to white, fine to medium, subrounded to subangular, fair sorting, tight, hard, some lithic grains, rare glauconite.

Siltstone, light green to brown, dolomitic, hard, some argillaceous, micaceous and pyritic.

Shale, brown to dark brown, firm, povily fissile.

Coal, black to brown, pyritic, in part shaley.

6820-6850 Siltstone, brown, argillaceous, hard, tight, coaly, dolomitic, in part sandy, micaceous.

6850-7340 Interbedded sandstone, siltstone, shale and coal.

Sandstone, white to brown, fine to medium, subangular, fair sorting, argillaceous.

Siltstone, brown argillaceous, sandy, carbonaceous.

Shale, dark brown, carbonaceous, micaceous, firm, slightly fissile.

Coal, black, conchoidal fracture in part, dull to vitreous.

7340-8330 Interbedded sandstone, siltstone, shale and coal.

Sandstone, light grey, consolidated clear quartz grains, fine to coarse, subangular to subrounded, poor to moderately sorted, fair to good porosity and permeability.

Siltstone, medium to dark brown, carbonaceous, firm, partly dolomitic.

Shale, dark brown, very carbonaceous in part, silty, fissile in part, firm.

Coal, black, vitreous, conchoidal fracture, trace of amber (bluish fluorescence).

8330-9770 Interbedded sandstone, siltstone, shale and coal.

Sandstone, light grey, very fine to medium grained, clay matrix, rare brown staining, subangular, poorly sorted, fair to poor porosity.
