

Depth (ft.)	Recovery (inches)	Description
8. 8375	3/4	<u>Shale</u> ; non calcareous, slightly carbonaceous, micaceous, medium grey, firm, with very fine carbonaceous micro-lamellae, no visible fossils. No gas.
9. 8335	3/4	<u>Interlaminated Sandstone &amp; Siltstone.</u> <u>Sandstone</u> ; quartzose, slightly calcareous, micaceous, light grey, very fine grained, subangular, well sorted, with very minor carbonaceous micro lamellae, no fluorescence, no cut, fair porosity. <u>Siltstone</u> ; very shaley, slightly calcareous, slightly carbonaceous, micaceous, medium to dark grey, no show. No gas.
10. 8210	1/2	<u>Interlaminated Siltstone and Shale.</u> <u>Siltstone</u> ; quartzose, dolomitic, light grey, friable, with minor carbonaceous micro-lamellae, no show. <u>Shale</u> ; very silty, non calcareous, micaceous, carbonaceous, the carbonaceous material occurring as very fine micro-lamellae, dark grey, firm, no visible fossils. No gas.
11. 8120	1	<u>Interlaminated Siltstone and Shale.</u> <u>Siltstone</u> ; quartzose, light grey, friable, no show. <u>Shale</u> ; carbonaceous, moderately calcareous, micaceous, medium to dark grey, firm, no visible fossils. No gas.
12. 7960	3/4	<u>Sandstone</u> ; quartzose, non calcareous, light grey, friable, fine to medium grained, angular to subangular, well sorted, open framework with very little matrix material, no fluorescence, no cut, very good porosity. Gas; C <sub>1</sub> - 100.
13. 7840	3/4	<u>Siltstone</u> ; quartzose, non calcareous, micaceous, light to medium grey, friable, no shows. No gas.
14. 7716	1	<u>Sandstone</u> ; very silty, non calcareous, light grey, friable, no shows. No gas.
15. 7616	3/4	<u>Siltstone</u> ; very silty, non calcareous, micaceous, medium grey, firm, no shows. Gas; C <sub>1</sub> - 150.
16. 7434	5/8	<u>Siltstone</u> ; very shaley, non calcareous, micaceous, slightly carbonaceous, medium to dark grey, firm, no shows.
17. 7415	1/2	<u>Sandstone</u> ; dolomitic, quartzose, micaceous, trace of lithics, light grey, very fine to fine grained, angular to subangular, moderate sorting, clay matrix, no fluorescence, no cut, good porosity. No gas.
18. 7318	1	<u>Siltstone</u> ; sandy, quartzose, dolomitic, micaceous, light grey, friable, no shows. No gas.
