

No. 48 7372 Rec. 3/4"

Sand, light grey, silty, very fine grained, clay matrix, paper thin dark shale laminae, carbonaceous.

No. 49 7360 Rec. 1/4"

Sand, badly fragmented

No. 50 7350' Rec. 1 1/4"

Sand, white to light grey, quartz, fine grained clay matrix, sub-angular, shale, laminae on one side, sand friable to firm, no fluorescence.

No. 51 7348' Rec. 1/2"

Shale, dark grey, very silty, carbonaceous, brittle

No. 52 7338 N.R.

N.R.

No. 53 7342' Fragments

Shale as above

No. 54 7332 Rec. 1/4"

Shale, soft, slightly silty

No. 55 7310

Shale, hard, dark grey to black

No. 56 7300. Rec. 3/4"

Sand, silty-fine grained, white to light grey, very calcareous, glauconitic, or chloritic, abundant quartz grains, very abundant green mineral.

No. 57 7298 Rec. 1"

Sandstone, grey to light green, fine grained, abundant green mineral, (glauconite or chlorite), subangular, ferruginous stain, micaceous, calcareous matrix.

No. 58 7278. Rec. 1 3/4"

Shale, soft-firm, non calcareous

No. 59 7253' Rec. 1 3/4"

Sand, calcareous, firm, quartz grains, calcareous matrix, silty, fine grained, dull even yellow fluorescence (very pale, mineral fluorescence) no cut.

No. 60 7240' Rec. 1"

Shale, dark grey, silty, slightly carbonaceous, non calcareous.

No. 61 7220' Rec. 1"

Shale, as above

No. 62 7104' Rec. 1 1/4"

Sand, very fine grained, silty, quartz, clay matrix, shale inclusion present (dark grey).
