

359029

DEPTH	%	DESCRIPTIONS
4280-4290	60	<u>Siltstone</u> , dark brown, carbonaceous, as above.
	40	<u>Sandstone</u> , friable, grains clear to milky, fine to coarse, subangular to subrounded.
4290-4300	80	<u>Siltstone</u> , dark brown, carbonaceous, as above.
	20	<u>Sandstone</u> , friable, fine to medium as above.
4300-4310	80	<u>Siltstone</u> , dark brown, carbonaceous as above
	20	<u>Sandstone</u> , friable, fine to medium as above
4310-4320	85	<u>Siltstone</u> , dark brown, carbonaceous, as above
	15	<u>Sandstone</u> , friable, fine to medium, as above
4320-4340	90	<u>Siltstone</u> , dark brown, carbonaceous, as above
	10	<u>Sandstone</u> , friable, fine to medium, as above
4340-4350	80	<u>Siltstone</u> , dark brown, carbonaceous, as above.
	15	<u>Dolomitic sandstone</u> , dark brown, as above.
	5	<u>Sandstone</u> , friable, as above
4350-4360	50	<u>Siltstone</u> , as above, dark brown, carbonaceous
	50	<u>Sandstone</u> , dolomitic, brown as above
		Trace <u>sandstone</u> , friable
4360-4370	60	<u>Siltstone</u> , dark brown, carbonaceous, soft bleeding gas.
	40	<u>Sandstone</u> , lighter brown, calcareous, friable to hard, very fine grained, quartz, lithic, carbonaceous matrix, trace common coarse quartz.
4370-4390	50	<u>Siltstone</u> , brown, carbonaceous, soft
	20	Sandy to friable, <u>sandstone</u> , lighter brown, calcareous.
	30	Sandy, loose, very fine to medium, poorly sorted, rounded polished quartz, clear to milky, lithic with apple green grains.
4390-4410	60	<u>Siltstone</u> , brown, carbonaceous as above
	40	<u>Sandstone</u> , light brown, very fine, fairly sorted, calcareous, friable to consolidated, quartz and lithic.
		Trace coarse sand.
4410-4430	50	<u>Siltstone</u> , brown, carbonaceous, as above.
	30	Sand quartz, medium to coarse to fine, poorly sorted, clear to white,
	20	<u>Sandstone</u> , light brown, very fine, calcareous lithics.
4430-4450	50	<u>Siltstone</u> , brown carbonaceous, as above
	50	Sand, loose fine to coarse, poorly sorted, round to polished clear to white quartz.
		Samples are poor quality, it is hard to wash and retain the loose sand, quantities are only estimated.
4450-4470	40	<u>Siltstone</u> , brown, as above
	50	Sand, loose, very fine quartz.
	10	<u>Sandstone</u> , medium brown, very fine, calcareous lithics.
4470-4490	70	<u>Sandstone</u> , very fine to <u>siltstone</u> , medium grey, calcareous, very tight.
	20	<u>Siltstone</u> , brown, carbonaceous.
	10	<u>Dolomite</u> , chocolate brown, hard.
		Drilling break 4515'. Circulated sample 4525'.
