

P. M. Cooney
2340 - 2370

Pelican - 1
100% Lst.
as above.

21/3/70
2010 hrs.

2370 - 2390

As above. Glauconite still abundant as inclusions in cemented grains, which compose over 70% of sample.

2390 - 2410

As above.

2410 - 2430

100% Lst. Medium-very coarse ^{grey} carbonate grains with carbonate cement. abundant glauconite grains but no ^{argillaceous} material.
Trace pyrite in some samples. Good porosity.
? Secondary carbonate in the form of well defined calcite grains.

2430 - 70

As above.

2470 - 90

As above. Abundant loose fossil frags, probablyavings.

2490 - 2510

As above.

2510 - 30

As above. Calcite cement seems to increase in some chips and reduces porosity to zero.

Run 17 3/8" casing at 2550'

2550 - 80

100% Cement.

2580 - 2620

Cement with minor lst, as above.

2620 - 60

60% Cement, 40% Lst. with shell fragments.
