

- 2980 - 3020 Marl 80% ; soft, lt. grey with bryozoa frags.  
20% loose bryozoal fragments
- 3020 - 3060 70% Marl as above ; occasional cuttings silt grade  
with less vigorous reaction to 10% HCl. 30% loose  
bryozoal frags. as above ; occasional fragments of  
forams.
- 3060 - 3100 As above, higher % of forams, not all fragmentary.
- 3100 - 3140 50% Marl as above ; 50% loose fossils as above.
- 3140 - 3180 As above
- 3180 - 3220 As above
- 3220 - 3260 40% Marl as above ; 60% loose fossils as above.
- 3260 - 3300 30% Marl as above ; 70% loose fossils as above.  
Bryozoans in far greater abundance than forams.
- 3300 - 3360 As above
- 3360 - 3400 50% Marl as above ; 50% loose fossils as above.
- 3400 - 3480 20% Marl as above ; 80% loose fossils as above.
- 3480 - 3520 As above ; bryozoans much narrower - tendency  
for smaller bryozoal fragments.
