

6000-6030	20	Sandstone as above
	20	Siltstone as above
	30	Shale as above
	30	Marl as above
6030-6060	60	Sandstone dominantly fine grained, well sorted subangular to subrounded, slightly micaceous and not very clean - not a light brown clay matrix as above. Minor loose coarse grains.
	10	Siltstone as above
	20	Shale as above
	10	Marl as above
6060-6090	30	Sandstone, coarse to granular loose grains, subrounded to rounded minor fine to medium sandstone as above
	20	Siltstone as above
	30	Shale as above
	20	Marl as above
6090-6110	40	Sandstone as above increase in fine to medium grained component
	10	Siltstone as above
	40	Shale as above
	10	Marl as above
6110-6130		As above, lot of pyrite in the sandstone
6130-6150	40	Sandstone dominantly coarse to very coarse.
	30	Siltstone
	20	Shale as above
	10	Marl as above
6150-6170	30	Sandstone dominantly medium to fine grained as above
	20	Siltstone as above
	20	Shale as above
	30	Marl as above
6170-6190		Trace sandstone as above
	50	Siltstone as above
	30	Shale as above
	20	Marl as above
6190-6210		Trace sandstone as above
	60	Siltstone as above
	20	Shale as above
	20	Marl as above
6210-6230	80	Sandstone, loose grains, quartzose, medium, well rounded (drilling break of 800'/hr)
	20	Siltstone as above
		Trace cavings as above
6230-6250		Trace sandstone as above
	40	Siltstone as above
	40	Shale as above
	20	Marl as above
6250-6270		Trace sandstone as above
	60	Siltstone as above
	20	Shale as above
	20	Marl as above
6070-6090	40	Sandstone as above + medium to fine grained subangular to subrounded, well sorted but dolomitic.
	60	Siltstone as above
		Trace cavings as above
6290-6300	20	Sandstone - dolomitic variety as above
	60	Siltstone as above
	20	Cavings as above
