

6300-6310		Trace coal, black, bituminous, vitreous, conchoidal fracture.
	10	Siltstone as above
	90	Marl and shale as above (cavings). Trip sample.
6310-6330		Trace fine, dirty sandstone
	70	Light to dark brown siltstone as above
	20	Shale as above
	10	Marl (cavings) as above
6330-6350		Siltstone as above
	10	Shale as above. Quite firm (large pieces up to 1' across coming over shaker)
	20	Marl as above
6350-6370		Medium to fine dolomitic sandstone as above
	60	Siltstone as above
	10	Shale, light grey, firm, carbonaceous flecks
	10	Coal as above
	10	Marl as above
6370-6390		Trace sandstone as above
	60	Siltstone as above
	10	Shale as above
	10	Coal as above
	20	Marl as above
6390-6410		Sandstone, medium grained, subrounded to rounded, well sorted, slightly micaceous and slightly dolomitic
	20	Siltstone as above (carbonaceous fragments)
	10	Shale as above
	20	Marl as above
		Trace coal as above
6410-6430		Trace sandstone as above
	30	Siltstone as above
	50	Coal as above
	10	Shale as above
	10	Marl as above
6430-6450		Trace sandstone as above
	80	Siltstone as above
	10	Shale as above
	10	Marl as above
6450-6470		Sandstone, fine, well rounded and sorted, good porosity and permeability, friable, + dolomite sandstone as above
	60	Siltstone as above
	10	Coal as above
	20	Shale and marl as above
6470-6480		Siltstone as above
	10	Shale as above
	10	Marl as above
6480-6500		Sandstone, both sands as above
	40	Siltstone as above
	10	Coal as above
	10	Marl as above
6500-6520		As above
6520-6540		Sandstone as above. Carbonaceous streaks in the sand.
	30	Siltstone as above
	10	Coal as above
	10	Marl as above
6540-6550		Sandstone as above but mostly coarse to very coarse subrounded to rounded loose grains.
	50	As above
