

3100		No recovery.	
3245		No recovery.	
3415		No recovery.	
3685	2"	Marl (claystone)	light grey fossiliferous (spines and shells) calcareous clay.
3830	1½"	Claystone (shale)	medium grey as under calcareous with white calcareous streaks, small shell debris (forams).
3955		No recovery.	
4100	1½"	Claystone (shale)	medium grey, very firm clay, trace fissility, calcareous with white streaks and specks, forams common.
4425	1½"	Claystone (shale)	medium grey, firm clay, calcareous, trace forams and shell debris.
4550	2"	Claystone (shale)	medium grey, firm clay, calcareous, trace forams.
4760	2"	Claystone	medium grey, brownish, trace pyrite lenses.
4975	1½"	Siltstone	light to medium brown, grades very fine sandstone, slightly clayey. Tight.
5020	1½"	Siltstone	dark brown - very dark brown, clayey to claystone in part, pyritic carbonaceous.
5233	1½"	Shale	very dark brown, carbonaceous, trace silty, diss. pyrite lenses.
5476	1½"	Siltstone	medium - dark brown, very clayey, grades very fine sandstone, carbonaceous.
5498	1½"	Shale	very dark brown, as under essentially, calcareous, trace silty.
5700	1½"	Shale	very dark brown, carbonaceous, trace pyritic and micaceous.
5852	1½"	Shale	very dark brown, carbonaceous with trace coal streaks, micaceous, diss. pyrite lenses.
5890	1½"	Shale (claystone)	very dark brown, carbonaceous, micaceous, pyritic, slightly silty.
5900	1½"	Sandstone	light brown grey, very fine - fine, trace silty-clayey, subrounded-subangular quartz with feldspar?, carbonaceous/or argillaceous flecks and thin laminae.
5949	1½"	Siltstone	light grey, clayey, faintly laminated.
6030	1½"	Sandstone	light grey very fine - siltstone, thin faint horizontal laminations.
6195	1½"	Shale	very dark brown, as under, siltstone laminae common, micaceous.
6242	1½"	Shale	very dark brown, carbonaceous-lignitic, thin coal streaks, silty lenses.
6315	1"	Shale	dark - medium brown, carbonaceous, silty with inter-laminated siltstone - horizontal laminae.
6455	1"	Siltstone	light grey, clayey.
6555	¾"	Sandstone	light grey, very fine - fine grained, silty, clayey matrix, subrounded-subangular quartz with feldspar, minor lithics. Poor visual porosity - Tight. No show.
