7220-60	50% siltstone as above, sandy, carbonaceous light to dark brown 50% shale - grey-green, firm (cavings?)
7260-7290	100% siltstone as above, trace sand, trace coal
7290-7320	100% siltstone as above Trace sand, fine grained, sugary, well sorted as above, trace coal as above
7320-7330	100% coal as above
7330-7390	90% siltstone as above 10% sand as above
7390-7410	20% coal as above 60% siltstone as above 20% sand as above, poor porosity
7410-7450	50% sand, white, sugary, very fine - fine grained, friable occasionally coarse 50% siltstone, brown, sandy, slightly carbonaceous, soft- firm. Trace coal and trace forams (discoid)
7450-7490	50% sand as above 50% siltstone, trace coal as above
7490-7510	20% coal as above 50% sand as above 30% siltstone as above
7510-7520	80% coal as above 20% siltstone and sand as above
7520-30	50% siltstone as above 30% sand as above 20% coal as above
7530-50	60% sand as above 20% coal as above 20% siltstone as above, including calcareous marine fossils: bryozoa etc.
7550-60	60% sand as above, including numerous coarse quartz grains 40% siltstone as above, dark brown, moderately firm, slightly sandy
7560-70	80% sand generally very fine to medium grained, sub-rounded, moderately sorted, no porosity, friable, some coarse, clear, angular to sub-rounded. No shows 20% siltstone to coal as above. Occasional forams and fossil fragments
7570-80	60% siltstone, dark brown, very fine grained, slightly carbonaceous, moderately firm. 40% sand as above
7580-7610	70% sand as above 30% siltstone as above
