7610-30 100% coal as above

7630-40 50% sand as above
50% siltstone as above, trace coal, trace dolomite

7640-60 90% sand, light brown to white, medium grained, as above
10% dark brown siltstone as above, fair porosity, Now shows

7660-90 90% sand as above
10% siltstone as above

7700-7710 100% sand, light brown to white, medium to very coarse,
angular to sub-rounded, well sorted (medium grain)
no fluorescence, no shows, fair porosity, friable.
Trace siltstone as above
Trace coal as above with brown/white fluorescence no cut,
amber? - reddish, translucent.

7710-7730 100% sand, coarse grained, clear, sub-angular, well sorted,
good porosity, no shows. Trace fine grain to medium sugary sand
Trace siltstone, trace coal, trace amber fluorescence.

7730-40 100% sand as above
Trace siltstone, trace coal as above

7740-60 90% sand as above
10% siltstone as above, occasional gumbo, sticky, light grey.

7760-70 80% sand as above
20% siltstone and coal as above

7770-80 50% sand as above, predominantly medium grained, light brown,
fair porosity
50% siltstone, dark grey-brown, carbonaceous, firm

7780-90 100% sand, medium grained-fine grained, well rounded, fair
porosity, well sorted, occasional coarse grains, no shows.
Trace coal and siltstone as above

7790-7810 70% sand as above
30% claystone? light grey, very sticky and soft
Trace siltstone and coal as above

7810-7820 90% sand as above
10% claystone? light grey, sticky gumbo
Trace siltstone and trace coal, trace pyrite and forams

7820-7830 100% sand as above, generally medium grain to fine grained.
Some coarse, fractured. Trace coal, siltstone.

7830-40 100% sand as above
Trace coal, gumbo claystone, siltstone as above

7840-60 70% sand
30% claystone non calcareous, grey-brown, very sticky, soft
Trace siltstone, coal as above
