

Depth Int	R.O.P.		Lithology and Remarks
5940-5960	124	50	Siltstone: A/A more carbonaceous & pyrite.
	150	50	Sandstone: A/A med to coarse grained, pyrite.
		TR	
5960-5970	120	50	Siltstone: A/A
		40	Sandstone: A/A
		10	Coal: A/A.
5970-5980	148	80	Sandstone: white, clear, loose, med to coarse grained, med sorted, subrounded quartzose. Fair ϕ . No fluor no cut.
		20	Siltstone: A/A brown, dark brown, micaceous soft, sandy in part.
5980-5990	120	80	Sandstone: A/A
		20	Siltstone: A/A
5990-6000	50	30	Sandstone: white, light brown, firm, fine, few v. coarse grains, moderately sorted, subrounded, quartzose. Al ₂ SiO ₅ calcareous cement. Poor ϕ No fluor No cut.
		60	Siltstone: dark brown, brown, soft, carbonaceous micaceous in part.
		10	Coal: black, v. dark brown, hard, blocky fracture, dull lustre.
6000-6010	41	90	Sandstone: A/A mostly loose quartz grains, medium to coarse.
		10	Siltstone: A/A
6010-6020	11	40	Siltstone
		60	Sandstone: white, brown, firm to hard, fine aggregates, coarse loose quartz grains med to coarse grains. Poor ϕ . Cemented with pyrite in part.
