

R. Seggie

6740-50	34	70% Sandstone fine to coarse grained clear, hard poor sorting sub angular, to sub rounded, quartz grains with siliceous cement. low to moderate
		20% siltstone chocolate brown, carbonaceous, firm.
		10% coal, hard with conchoidal fracture, black dull lustre
6750-60	135	50% sandstone A/A
		50% siltstone A/A but lighter in colour, sandy, with coalified plant debris.
6760-70	155	50% sandstone A/A trace pyrite
		50% siltstone A/A
6770-80	210	50% sandstone A/A
	215	50% coal A/A
6780-800	220	60% sandstone A/A
		20% siltstone A/A
		20% coal A/A
6800-10	230	90% sandstone A/A
		10% coal A/A
6810-20	240	50% sandstone A/A
		30% siltstone A/A
		20% coal A/A
6820-30	89	60% sandstone A/A
		20% coal A/A
		20% siltstone A/A
		sandstone & siltstone are finely interbedded with minor coal & pyrite in some chips
