

7190 - 7200	126	100	Sandstone: A/A med to coarse gr. coarse grains loose.
7200 - 7210	101	100	Sandstone: white, clear, hard cemented and loose, medium to coarse some very coarse, poorly sorted, subangular, quartzose, where cemented - silicious and slightly calcareous cement. Mod ϕ . No fluor No cut.
		TR	Shale: very carbonaceous, heavily pyritized in very fine networks.
7210 - 7220	230	50	Sandstone: A/A fine to medium, some coarse, cemented.
		50	Coal: A/A.
7220 - 7230	30	80	Sandstone: A/A medium to very coarse, loose large pieces of pyrite.
		10	Siltstone: A/A brown, soft-firm, very carb.
		10	Shale: black, brown, subfissile, very carbonaceous
		TR	Coal: A/A
7230 - 7240	60	100	Coal: black, firm-hard, blocky, dull lustre.
		HTR	Shale: A/A.
7240 - 50	49	30	Sandstone: A/A fine to medium grained, carbonaceous, cemented
		20	Siltstone: A/A brown, soft, carbonaceous
		50	Shale: A/A black, brown, laminated carbonaceous
		HTR	Coal: A/A
			White fluor & white cut from tarry-amber carbonaceous piece. Rare.
