

Mr H. Murchie
Director of Mines
Tasmanian Department of
Mines

3.0 The pile joint was severed by explosive charge at 12 metres below the sea bed. The well-head and pile joint were recovered. This was discussed and concurred with by yourself on 20 August 1984.

Following completion of abandonment procedures in accordance with your approvals the rig continued its preparation for the move to the Well, Tasmanian Devil No. 1.

Respectfully yours

Lindsey I. Lipscomb
