

ESSO BASS NO. 1 WELL

Core No. 15. 7693

Specimen 65 /14 X50 X-Nicols

Equant, sub angular to sub rounded quartz, and minor K-Feldspars in a finely divided sericite and clay matrix. Rounded accessory Zircon present at (Z) and muscovite at (M). Grain size varies from 1/10 to 1/5 millimetres.

Photograph illustrates well sorted nature of sandstone.
Dark areas are due to crossed nicols.
