

LIST OF FIGURES

Figure 1	Location Map
2	Bass Basin Stratigraphy
3	In-line 530, with colour bar
4	Fault Interpretation, Time Slice 1920 milliseconds
5	EVCM Seismic Markers, In-line 530
6	Near Top 2718 Sand, Amplitude
7	Near Top 2718 Sand, Detailed Amplitude
8	Lineament Interpretation, Early Eocene, Dip Magnitude
9	Lineaments, In-line 850
10	Base Miocene Volcanics, Time Structure
11	Oligocene/Miocene Faults, In-line 450
12	Time Pull Up beneath Volcanic interval, In-line 560
13	Time Push Down beneath Volcanic interval, Cross-line 1220
14	Upper EVCM Intrusive, In-line 100
15	Possible Intrusives, In-line 535
16	Deep seismic Onlap Event and Basalt Character
17	Yolla Structure Fault Compartment, Early Palaeocene Depth
18	Top EVCM + 15 msecs, Amplitude and Bright Spot
19	Deep Seismic Onlap Event, Amplitude
20	Deep Seismic Onlap Event, Depth Structure
21	Seismic events chosen for Amplitude Trials, In-line 530
22	Trial 2 (Near Top 2718 sand + 55 msecs), Amplitude
23	Trial 3 (Early Palaeocene - 25 msecs), Amplitude
24	Trial 2, Autopick Time in Yolla 1 fault Compartment
25	Trial 3, Autopick Time in Yolla 1 fault Compartment
26	Stacking Velocity Distortion close to Volcanics
27	Calculation of Volcanic Velocity Model
28	Miocene Volcanics Interval Velocity Model
29	Volcanics Velocity Profile Comparison
30	Top Eastern View Coal Measures, Depth Structure
31	Yolla Structure Schematic

LIST OF TABLES

Table 1	Yolla 1 DST Summary
2	Well - Seismic Correlation Table
3	Amplitude Trials
4	Yolla 1 Average and Interval Velocities
